

2018

IEPNG Annual Report

January – December 2018

Presented: 26th April 2019

Contents

Presidents Overview	1
CEO's Foreword	2
Board of Directors	3 - 6
Vision, Mission, Mandate	7
Strategic Objectives	8
Financial Report	9
Auditor's Report	11
Balance Sheet	13
Statement of Cash Flow	14
Detail Income and Expenditure Statement	19 - 20
2018 Information Systems Audit Report	21 - 36
Branch Report	37 - 60
Competency Based Assessment (CBA)	61 - 63
Activity Plan 2019 - 2020	64 - 65
Financial Members as at 10th April 2019	66 - 82
Structural Engineers as at 10th April 2019	82

President's Overview

When we decided to embark on this mission of improving and raising the standard of engineering practice in Papua New Guinea, there were a lot of uncertainties and doubts, simply because we were going to attempt something that has never been done here before. While we tried to foresee some feasible outcomes, and this was assisted greatly by our dedicated friends from Engineers Australia, with the volume of challenges that confronted us, we knew the only thing we needed to do was to put in a lot of commitment, to act on advice, to not only change, but be willing to change.

The Council had to direct financial resources towards this cause – we believe it was the only way to go about bringing the changes we want. Hundreds of man-hours were loaded onto the efforts, and in many occasions, that meant visiting the provinces, and all major employers. Some places/employers demanded and had the benefit of more than one visitation. Now finally, Competency Based Assessment System is officially the mechanism of assessing engineers for professional registration.

On the academic front, similar transformation is taking shape at the PNG University of Technology. Department & Industry Advisory Committees are in the process of reviewing the curriculum

for all the engineering programs. The Engineering and Science Industry Advisory Board is driving the agenda on Accreditation with a two-prong approach – be the liaison/evaluator for external assistance and secondly, rounding up support from industry players. Everyone is working tirelessly to tick all the boxes. Come October 2019, we are hopeful that engineering programs delivered at Unitech will have attained provisional accreditation.

Accredited engineering programs provided by Unitech and the Competency Based Assessments System of assessing engineers for registration should eventually be working in tandem for us to realize our Mission and that is producing quality graduates who will then rise up to become competent engineers.

These are key prerequisites required for us to forge our interest into the APEC Register. With the developments and the efforts so far, I am pleased to announce that the prospect is looking good for the engineering fraternity.

However, there is still a need for organizations to come up with their own Competency Assessment Matrix that can be used to measure the different levels of competencies for every engineering position in their respective organizations. This Matrix has a dual purpose – for use as a guide for the requirements for continuous professional training and development for individual engineers and also to influence promotions/awards.

The Institution is taking an aggressive approach on the Graduate Provisional Development Program. Those who will graduate after successfully completing an engineering program at Unitech will receive their Log Book. This is to ensure the development/training of every graduate is tracked on day one.

The role engineers play in the development of infrastructure is significant, notwithstanding the fact that the amount of financial resources placed on them is huge. Apart from being qualified, and competent, there is now a greater need to be ethical as well. We are gaining recognition across all sectors of the community and slowly making representations into various statutory Boards and it is all for the sake of good governance. A strategic outcome from this is the fact that the Acts pertaining to the existence of these Boards have included provisions for IEPNG to be represented by nomination. On the other hand, by serving in this statutory organizations, engineers get to build up their profiles as it adds to their credentials.

We will venture into major Charity Fundraisers as our collective commitment to give back to the Community. The Council has initiated Charitable Challenges, which will be held bi-annually. In 2019 we will track the Kokoda and climb Mount Wilhelm to raise funds to assist selected hospitals. I urge you all to support this worthy cause.

Lastly, but not the least; I have been part of the Council for over a decade now and I have seen a lot of structural changes. The profession has come a long way and we can only get better. There remains a lot more work to be done. I will now serve my final two years as the Past President and then go out gracefully. I have confidence in those who will carry IEPNG from here on. Thank you for the opportunity and the trust bestowed upon me in all these years serving the fraternity. God Bless Papua New Guinea.

CEO's Foreword

My Dear Members of IEPNG, our Partners in the Industry and Friends, I wish to thank you all for your support in 2018 where we all have developed and maintained a very strong partnership with each other. The government, our partners in the industry and the tertiary educational communities

have really assisted us when we needed them.. On the international scene, we continued to maintain a strong relationship with the Institution of Professional Engineers New Zealand (IPENZ), Institution of Engineers Singapore (IES), South Pacific Engineers Association (SPEA) and the Federation of Engineering Institutions in Asia & Pacific (FEIAP). During the year the IEPNG also hosted the APEC Engineer meeting in Port Moresby.

The main activity in 2018 was the preparations for the implementation of the Competency Based Assessment System. The main focus was on awareness to ensure our members and their employers are informed and understand the CBA. I wish to thank the President, Mr Brian Alois and the Council of IEPNG for their support in the rolling out of the CBA awareness. The Council went to provinces to setup branches to assist IEPNG in the awareness program. The IEPNG is very grateful to the efforts and time put in by Council Member, Mrs. Edea Bouraga who was facilitating and delivering the CBA awareness around the country. She did all the work at no professional costs to IEPNG. We only assisted her with airfares, accommodation and a bit of travelling allowance. I also wish to thank her husband and her children for allowing her to assist IEPNG. I also thank our office staff for all work they put in to ensure that the CBA awareness is successful. I also wish to thank Mr. Sen Hugo, our Australian trained and certified Assessor who in turn trained and certified Ms. Finkewe Zurecnuoc and Mr. Franz Hemetsberger as qualified Assessors in 2018. Our other Assessor, Mrs. Edea Bouraga was certified as an Assessor by Mr. Hugo in December, 2017. See the CBA report in the Magazine for full details.

In April, 2018, the IEPNG was privileged to work with the APEC Engineer's Secretariat to host the APEC Engineer workshop in Port Moresby as a part of the APEC Leaders meeting. Members of the APEC Engineers Register attended the meeting together with invited delegates from the engineering fraternity in PNG. The outcome from the workshop shows that IEPNG's competency standards are

similar to the standards that the APEC Engineers Register has set for its members to subscribe to.

The Institution continued to assist the Unitech to enable the University to have all its engineering degree programs gain accreditation to the Washington Accord. We continue to participate at the Industry Advisory Board (IAB) to push the accreditation agenda through partnership with the Industry. The IAC has been very supportive of the University by assisting with upgrades to the laboratories and other areas. Engineers Australia was invited and accepted the invitation from IEPNG to be the Accreditation Agency for Unitech. EA have been very much involved with Unitech in 2018 to ensure that the University maybe able to get provisional accreditation by September, 2019.

Our membership continues to be steady and this is an indicator on the confidence in the good relationship and partnership that the IEPNG has with the business community at large. Over 80% of our membership is made up of foreigners working in our country with 20% from PNG Nationals. There are still many national engineering professionals who are not registering themselves as required by the Law using the CBA system in 2019.

The 2018 audited financial records indicate that we made slight decrease in our net profits from that of 2017. The actual income derived was K 2,203,671 compared to K 2,500,173 in 2017 which shows a slight decrease of K 296,502 in 2018.

The actual expenditure in 2018 was K 1,869,182 compared to K 1,839,878 in 2017 with a slight decrease of K 29,304. The actual surplus for 2018 is K 334,488 as at 31st December, 2018. Refer to full Annual Financial Report 2018 for details. I now look forward to 2019 as we roll out of the CBA for registration of engineering professionals around PNG. It is now incumbent on us all to work together to ensure that we make IEPNG become a successful professional body that serves the interest of its Members.

Thank you and pleasant reading.

Board of Director's

Brian Alois

President of IEPNG and Chairman of PERB

Comes From Rambutso Island in Manus Province.

He graduated in 1993 at the Papua New Guinea University of Technology with a Bachelor in Civil Engineering. Admitted to Member on 16 April 1999, Joined IEPNG as Student Member on 6 May 1991. He is currently working with the Department of Works in Lae as a Momase/Islands Regional Works Manager. Currently President of IEPNG & PERB.

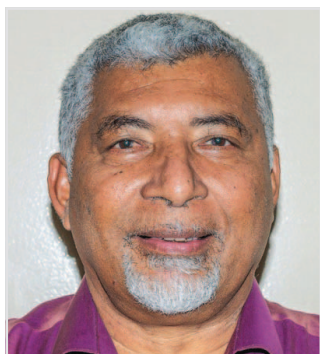

Finkewe Zurecnuoc

Deputy President

Ms Finkewe Q Zurecnuoc FIEPNG RegEng graduated with a BE In Electrical Engineering-Power Systems in 1983 from the University of Technology. She also has a second BE from the Royal Melbourne Institute of Technology in 1992 under Bougainville Copper Limited Scholarship. Ms Zurecnuoc was the first PNG woman to graduate as a Power system engineer. There were no other PNG woman engineers around when she graduated with her first BE in 1983. She would have been the only PNG woman engineer around at one time and in employment in the history of this nation. All other female engineers, regardless of discipline graduated after her. She put PNG woman and PNG women in engineering on the map. She has been an engineer for over 35 years. She was on one of the three first ever engineering students in PNG to be sponsored by the Ok Tedi Mining Limited, which was then under construction at the time she was attending University. The first 20 years of her employment was with the Mining Industry in PNG. She has worked at the OK Tedi Mine on two occasions, at Bougainville Copper and at Porgera Gold Mine. When the Law in PNG said that women were not allowed in the Underground Mine, she was an exception and was allowed into the underground Mine because of the nature of her profession. Her last employment in the Mining Industry was at the Ok Tedi Mine as the Chief Engineer at the Milling Plant. She was at Ok Tedi in May 1984 when the first ore was put into the crushers and processing at the Ok Tedi Mine started. These days she works as a consulting engineer where she continues to provide services to the Mining and Oil & Gas sectors and other areas. Recently she has been involved in the construction of some major Buildings in Port Moresby including 3 Floors BSP Gordons and Waigani, 11 floors Sir Manasupe Haus, the Seat of Government in PNG and 9 floors Air Niugini Apartments. Ms Zurecnuoc has a long involvement with the IEPNG. She joined the SPE in 1984 as a graduate engineer and in 1998 was made a Fellow of the Institution, the only female Fellow. She was the COE/Registrar of IEPNG between 2004 and 2006. IN her term as the CEO, the Professional Engineers Registration Act (PERA) was amended for the first time, giving teeth to the Act and increasing penalty of unregistered engineers to K200,000. She has been a Board Member on many occasions including representing the Resources Sector, the Tabubil Branch and the Lae Branches. In 201 she was elected as a Board Member for two years 2015 to 2017. In 2017 she was elected as the Deputy President of the IEPNG for 2 years.

Ms Zurecnuoc is also the Chairlady of the Women in Engineering (WIE), a post she has held for since 2012. She was on the Board of PNG Power Limited from 2013 to 2018. She has also served on the Morobe Physical Planning Board and is a current Member of the Board of Examiners with the MRA. She is also the Alternate Board Member for Energy on the Higher Education, Science and Technology Council. A role model for both male and female engineers.

Board of Directors

Ilaiamo Ila Mari
Past President

Mr Mari holds a Masters in Civil Engineering majoring in structures at the University of Queensland, Australia. He also holds a Bachelors Degree in Civil Engineering from the University of Technology, which he attained in 1980. His other educational qualifications included a post graduate certificate in Management studies from the Naval Staff College in Sydney, Australia. Mr Mari has worked in several organisations over the years, including the Kumul Consolidated Holdings (formerly the Independent Public Business Corporation), the Department of Works, and even had a three-year stint at the Papua New Guinea Defence Force Engineering Batalion. Mr Mari currently works at the Depratment of Works as the Project Director for Asian Development Bank projects. Mr Mari is a Fellow Member of IEPNG and is a registered engineer. He was the Deputy President of the previous IEPNG Board (2012-2013) and a Member of the board before that (2010-2013).

Christopher Kobal
Continuing Elected Member

Been with the PNG University of Technology for over 30 years as Assistant Lecturer then Lecturer and finally Senior Lecturer and Head of Civil Engineering Department. Joined Unitech in February 1984. Member of the Academic Advisory Committee (AAC) at National Polytechnics of PNG, Lae. Member of the Academic Advisory Board of the National Polytechnic Institute of PNG Member of the NISIT Council and also Construction Materials Testing - Advisory Committee (CMT-AC) Member of the Panel of Experts at DHERST Mr Kobal is currently a Member of IEPNG and is a registered engineer.

Joel Y. Koma
Elected Member

Joel KOMA has a Masters in Structural Engineering from The University of Adelaide, South Australia in 2013. After completion of his studies, he joined Stocks & Partners Ltd in February 2014 as Senior Structural Design Engineer. A dedicated civil/structural engineer with over 10 years of diverse design, construction and project management experience including college buildings, communication towers, residential houses, hotels, roads, and bridges. Can professionally perform all facets of civil/structural engineering jobs from project feasibility to site survey, project design and documentation, construction supervision and project management. Shown the capacity of managing a team of engineers and technical officers for the highest benefits of the individuals and the project itself. Flexible in adapting to new changing working environments but perseverant in undertaking everything to achieve a set goal, whatever are the difficulties. Always alert, constantly looking for something new to feed own intellect. Quick and sharp to catch ideas, resolve issues and problems.

Currently a Registered Member of IEPNG and also a Counsil Member serve since mid-2018. Was IEPNG Unitech Student Branch President in 2004.

Board of Directors

Edea Bouraga
Elected Member

Mrs. Edea Bouraga is a Mechanical Engineer and runs her own engineering design and consultancy business under their family company, Inside Out Limited after retiring from the Department of Works as a public servant in 2014. She specialized as a Mechanical Engineering Design Engineer for Building Services in the Design Services Division of the Department. She decided to expand her area of expertise and moved to the Plant and Transport Division on a promotional transfer, where she enhanced her engineering practice area to the operations and management of Heavy Plant and Equipment and transport fleet in the road construction industry.

Edea holds a Master of Engineering Management degree from the University of Newcastle, NSW in Australia, a Diploma in Management from the Divine Word University, Madang and a Bachelor of Engineering Degree in Mechanical Engineering from the PNG University of Technology, Lae. Edea is a registered Mechanical Engineer with the Professional Engineers Registration Board (PERB) of PNG, a financial member of the Institution of Engineers of PNG Inc. (IEPNG) and the PNG Australia Alumni Association (PNG AAA). She is an executive committee of the Port Moresby Branch of IEPNG, Women in Engineering PNG (WIE), and an elected member of the Board of PERB and IEPNG.

At the end of last year, she qualified as the first IEPNG Professional Engineers Assessor under the New Competency Based Assessment (CBA) process for registration to the Professional Engineers Registration Board (PERB) of PNG.

Edea is passionate about Engineering and in particular the development of Ethical Professional Engineers in PNG. She firmly believes that PNG can in the near future become the Worlds' Best Engineers producing country.

Mrs. Bouraga is also currently the Project Team Leader of the Reformation Ministries and Churches Network (RMCN) Church Auditorium Building Project in Port Moresby. She is committed to seeing this multi-million Kina Auditorium project realized through faith in God and the assistance of the highly esteemed RMCN National project team with a resolute conviction that "With God ALL things are possible"

Edea and her husband Frank Bouraga have a son and three daughters.

Dan Joseph Tapado
Appointed Member

Mr Dan Tapado, from the Philippines, has a bachelor of Science in Civil Engineering from the Columban College in the Philippines. He has clocked 18 years of civil engineering and building works, both in PNG and the Philippines. He was trained in office management and field supervision and during his time in the country, has directly supervised and managed seven major road projects, all funded by donor agencies. His areas of expertise include office management/administration, site management, quality control management, budget and cost analysis, material procurement, cost monitoring schedule and construction planning and scheduling.

Mr Tapado is a financial member of IEPNG and registered engineer, based out of Lae. He currently works as the Office Manager for TSC Contractors in Lae, involved in various donor-funded projects in the Highlands of PNG.

Franz Alois Hemetsberger

Apointed Member

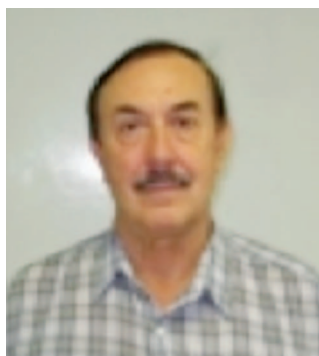

Home Province: Enga Province

iePNG Member ID: 5299, ieAust Member: 2368360

Franz has a deep urge to serve his country and knows that being a part of iePNG gives him the means to do this both in a technically and leadership capacity.

Franz is the Superintendent for Electrical & Instrumentation Maintenance at the Fixed Plant Maintenance department at Newcrest Mining Limited's Lihir Gold Operation. Franz has been an advocate for training for Papua New Guinean graduates and vacation students within Newcrest. He feels there is a deep need for targeted mentorship to equip Papua New Guinea's young engineers. It will have a significant impact Papua New Guinea's future.

One of his mandates in iePNG is to set up the standard for the Graduate Development Program that companies can adopt which complements the new Competency Based Assessments being rolled out. With an increase in the competency for Papua New Guinea's engineers, it is felt that the standards by which engineering within PNG will get better. He imagines a Papua New Guinea that has its own established technical standards and legislation that is on par with the best in the world.

Joseph I. Hamylton

Elected Council Member

Mr. Hamylton is a Director of Stocks & Partners, Consulting Engineers and Project Managers in Port Moresby. He became the Member of IEPNG sixteen years ago and been involved with the Institution since at both the Chapter and then Board level. He was also the Board Member of National Institute of Standards and Industrial Technology and National Roads Authority. Consistent with the Papua New Guinea Medium Term Development Strategy, Mr. Hamylton immensely contributes to building the nation's engineering manpower capacity and training national engineers. The engineering manpower is crucial to driving the development of Papua New Guinea. He aims to support IEPNG, APEC Engineers Register and SPEA to progress and dedicate himself towards fostering improvements of the engineering fraternity. His main goal is for IEPNG to acquire land to build the Technology Haus to provide a home - base for the engineers of Papua New Guinea.

Aspirations for IEPNG and the Engineering Profession

- I wish to propose that future LNG Gas opportunities to involve our engineering fraternity in the project negotiations and IEPNG willing and ready to provide its technical input to the negotiations for greater PNG participation and for a prosperous outcome.
- Emphatically my aim always is to support the Institution of Engineering PNG to progress and dedicate my team towards fostering improvement of Port Moresby and other Branches.
- As I reiterate again, I haven't given up on my main goal that is the construction of the IEPNG Technology Haus as a joint venture project for government and IEPNG to establish under the public private partnership.
- I have a strong desire for the IEPNG to be engaged as an independent body in ascertaining the adherence of all technical standards in the country. This will also address concerns raised by many engineers and government ministers. It is my strong desire for the IEPNG to strengthen its partnership with the Government and the private sector organisations.
- We have already taken the right path in developing the future of our Engineers in PNG towards international recognition and I intend to continue in this direction and take further steps to succeed this goal.

Our Vision, Our Mission, Our Values

OUR VISION

The Institution of Engineers PNG is dedicated to enhancing the quality of life of the people of Papua New Guinea by the responsible and creative application of engineering.

OUR MISSION

Our Mission to the Community

- Advance the practice of engineering in the interest of the safety, well-being and quality of life of members of the community

- Promote an engineering management and practice style that will ensure a sustainable development of the environment

- Assure the community of the quality of the engineering profession by a continuous process of accreditation of qualifications and monitoring of the competency standards of the profession

Our Mission to our Members

- Determine and encourage high-level technical and ethical standards

- Sustain standards with ethics and discipline

- Encourage innovative solutions

- Facilitate the acquisition and sharing of knowledge

- Represent their interest

OUR MANDATE

To hold a clear mandate to represent the Papua New Guinea engineering community by:

Upholding and promoting the profession of engineering

Providing leadership and engineering advice to Governments, NGOs, Organizations and the public on key issues

Meeting the professional needs of Members.

OUR IDENTITY

IEPNG is a network within the engineering professions dedicated to the improvement of engineering practice for the benefit of its Members and the nation.

Our collective activities will be represented as those of the Professional Engineers Registration Board (PERB) of Papua New Guinea.

OUR MEMBERSHIP

We have several Member groups, in recognition of the diversity of engineering practice:

Those who hold a tertiary qualification in engineering, use a systematic process of analysis, design/synthesis and implementation, strive to operate responsibly in accordance with a code of ethics set by their peers, and engage in continuing professional development. These members are classed as either Fellow Members (FIEPNG) or Registered Members (MIEPNG), depending on the professional level at which they use their skills and competence.

Those with other College or even some tertiary qualifications, and practical experience that equips them to practice engineering as a systematic process – classed as Technician Members (TechIEPNG)

Those with suitable academic qualifications who aspire to attain the above classes by developing engineering practice competence during monitored employment – classed as Graduate Members (GIEPNG)

Those who express an interest in interacting with engineers although they do not have formal training in engineering themselves – classed as Companions

Those studying for engineering qualifications – classed as Student Members (StudIEPNG)

Those whose significant contributions have been recognized Fellow (FIEPNG) or Honorary Fellow (HonFIEPNG)

Those who are not engineers but who contribute to IEPNG in other professional capacities – classed as Companion (ComIEPNG)

Strategic Objectives

ROLE OF IEPNG

IEPNG is the national forum for the advancement of engi-neering and the professional development of our members in Papua New Guinea.

Our role includes activities that:

Advance the science and practice of engineering

Cultivate lifelong learning by our members

Promote the contribution of the profession as widely as possible

Champion professional and ethical conduct

Welcome all those who wish to practice engineering

Allow members' aspirations to flourish; and stimulate and learn from their creativity and innovation

Celebrate excellence in engineering outcomes

Draw inspiration from our engineering heritage

Sustain the integrity of the profession

Take the lead in advocacy of the profession

OUR VALUES

The values that IEPNG and its entire Membership aspire to:

Professionalism, integrity and honesty

Objectivity and factually-based judgment

Ethical, fair and impartial behavior inclusion of all age-groups, genders and cultures

Amongst our Membership, we:

Encourage excellence

Contributing to collective wisdom by sharing information

Improve our own understanding of engineering technology

Encourage and rewarding high standards and achieve-ment

Dealing with external stakeholders:

Valuing the safety and well-being of the community

Avoiding or mitigating the adverse impacts of our work

Reducing the risks of loss of life, injury or suffering

Minimizing potential dangers associated with our work

Apprising stakeholders of identified risk

Recognizing the long-term imperative of sustainable management

Using resources efficiently to encourage environmentally sound reuse, recycling and disposal.

Financial Report 2018

REPORT OF THE BOARD MEMBERS

The Board Members are pleased to present their report on the financial statements of the Institution for the year ended 31 December 2018.

Nature of Entity and Activities

The Institution of Engineers Papua New Guinea Inc is a non-profit and non-government organisation and is incorporated and registered under the Associations Incorporation Act of Papua New Guinea.

The primary purpose of the Institution is to promote the interests of the engineering profession and its members in Papua New Guinea.

Institution Information

Registered Office: Portion 637
PO Box 881,
Waigani, NCD

The Board Members for the 2018 year were:

- Mr. Brian Selarn Alois (President)
- Ms. Finkewe Zurecnuoc (Deputy President)
- Mr. Ila Mari
- Mr. Christopher Kobal
- Mrs. Edea Bouraga
- Mr. Joseph Hamylton
- Mr. Joel Koma
- Mr Dan Joseph Tapado
- Mr Franz Hemetsberger

Secretary and Chief Executive Officer:

- Ms Emie Mavoko (Secretary)
- Mr. Benedict Mick (CEO)

The Auditor for the 2018 year was:

Niugini Business Consultants
Registered Public Accountants & Auditors
PO Box 391
PORT MORESBY, National Capital District
Papua New Guinea

Banker Bank South Pacific Limited
PO Box 211
WAIGANI, National Capital District

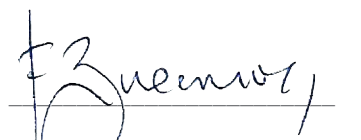

BOARD MEMBERS' STATEMENT FOR THE YEAR ENDED 31 DECEMBER 2018

The Board members state that the accompanying statement of net assets and statement of income and expenditure and cash flows are drawn up so as to exhibit a true and fair view of the state of affairs of the Institution at 31 December 2018 and the results of the operations of the Institution for the year ended on that date.

No circumstances have arisen which render adherence to the existing method of valuation of assets or liabilities of the Institution misleading or inappropriate.

For and on behalf of the Board.

AUDITOR'S REPORT TO THE MEMBERS OF INSTITUTION OF ENGINEERS PAPUA NEW GUINEA INC

Scope

We have audited the financial report of Institution of Engineers Papua New Guinea Inc for the year ended 31 December 2018 as set out on pages 4 to 12. The Institute's Board Members are responsible for the preparation and presentation of the financial statements and the information contained therein. We have conducted an independent audit of the financial report in order to express an opinion on it to the members of the Institution.

Our audit has been conducted in accordance with International Standards on Auditing to provide reasonable assurance as to whether the financial report is free of material misstatement. Our procedures included examination, on a test basis, of evidence supporting the amounts and other disclosures in the financial report, and evaluation of accounting policies and significant accounting estimates. These procedures have been undertaken to form an opinion as to whether, in all material respects, the financial report is presented fairly in accordance with International Reporting Standards and the provisions of the Accountants Act (1996) as to present a view which is consistent with our understanding of the Chapter's financial position, the results of its operations and its cash flows.

The audit opinion expressed in this report has been formed on the above basis.

Unqualified Audit Opinion

In our opinion, the financial report presents fairly the financial position of the Institution of Engineers Papua New Guinea Inc as at 31 December 2018, the results of its operations and cash flows for the year ended in accordance with applicable Accounting Standards, and with the provisions of the Accountants Act (1996).

Net cash inflow/(outflow) from financing activities	-	-	
Net Increase / (decrease) in cash held	319,120	(110,191)	
Cash at beginning of financial year	2,674,555	2,784,746	
Cash at end of financial year	2,993,675	2,674,555	
Represented by:			
Cash at bank and on hand	2,984,440	2,665,320	
Term Deposits	9,235	9,235	
	2,993,675	2,674,555	

For the purpose of the statement of cash flows, cash includes cash on hand and cash on short term deposits net of bank overdraft.

NOTES TO AND FORMING PART OF THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2018

1. STATEMENT OF ACCOUNTING POLICIES

A. Revenue

Revenue is accounted for on the accrual basis of accounting, except for membership fees which are recognised on a cash basis.

B. Properties, Plant and Equipment

Property, plant and equipment is stated at cost less accumulated depreciation, except for leasehold land which is valued at cost.

Depreciation is calculated from the date an asset becomes operational on a straight line basis to write off the cost of the assets over their estimated economic lives.

The estimated useful economic lives are as follows:

Buildings	3.0 - 4.50%
Office Equipment	11.5%
Computer Equipment	22.5%
Furniture and Fittings	11.5%
Motor Vehicles	20.0%

C. Impairment of Assets

Where the recoverable amount of an asset falls below its carrying amount, the asset is written down to its recoverable amount. There has been no impairment in the 2018 financial year.

D. Income Tax

The Income of the Institution is exempt from income tax by virtue of *Section 27(C)* of the *Papua New Guinea Income Tax Act 1959*, as amended.

E. Comparative Figures

Where necessary, comparative figures have been adjusted to conform with changes in presentation in the current year.

IEPNG INFORMATION SYSTEMS AUDIT REPORT

This Information Systems Audit has been performed and report compiled for presentation to the Board Members of the Institution of Engineers of Papua New Guinea Inc.

Information systems audits focus specifically on the Member Services computer environment of IEPNG to determine if the member services information system effectively support the confidentiality, integrity and availability of information it holds, and its intra relationship with the Accounting System.

We wish to acknowledge the cooperation of IT, member services and accounts staff included in our audits.

Thank you.

JOHANIS WANDAKI
AUDITOR
6th February 2019

Introduction

This System audit was conducted based on the request of the Board Members of Institution Engineers Papua New Guinea Inc's Annual General Meeting's (AGM) outcome for System's Audit to be conducted in the following areas;

- Membership Services System in place to record, track and keep database of engineers;
- Policy and procedures in place to manage, administer and engineering profession; and
- others

Objective & Scope

Based on the above we have conducted the system audit on the 04th of February to the 08th of February 2019. Our audit Objectives and scope were established as follows:

Objective

The objective of our review was to perform an operational assessment of the key business processes for IEPNG. This included:

- Obtaining an understanding of the relevant processes;
- Evaluating processes' effectiveness and efficiency;
- Evaluating the internal control environment by testing selected control objectives;
- Assessing compliance to corporate policies and procedures;
- Identifying opportunities for process and internal control improvements; and
- Providing "best practices" where opportunities for improvement exist.

Scope

The scope of this audit was based on the terms of references (TORs) as issued. We have categorised all processes into 2 main categories:

1. Application Controls;
2. General Computer Controls and capability Assessments

Internal control evaluations were based on interviews with IT operational personnel, observation of key processes, walk through and transactional testing and review of Processes and Procedures.

1. IT System Application Controls Audit

Applications are software programs that facilitate an organisation's key business processes.

Application controls relate primarily to the controls programmed within an application that can be relied upon to mitigate business process-level risks.

Typical administrative processes dependent on software applications include member services, accounting system, network system and database management system, applications controls compliance with corporate policies and applications' operational environment's protection.

Our focus was based on the application controls designed to ensure the complete and accurate processing of data from data input to information output, database management, recovery and continuity. Failings or weaknesses in these controls have the potential to directly impact IEPNG's operations, its members and other interested third parties whom rely on outputs of IT operational system.

Impacts may range from delays in service to possible system failures and financial losses.

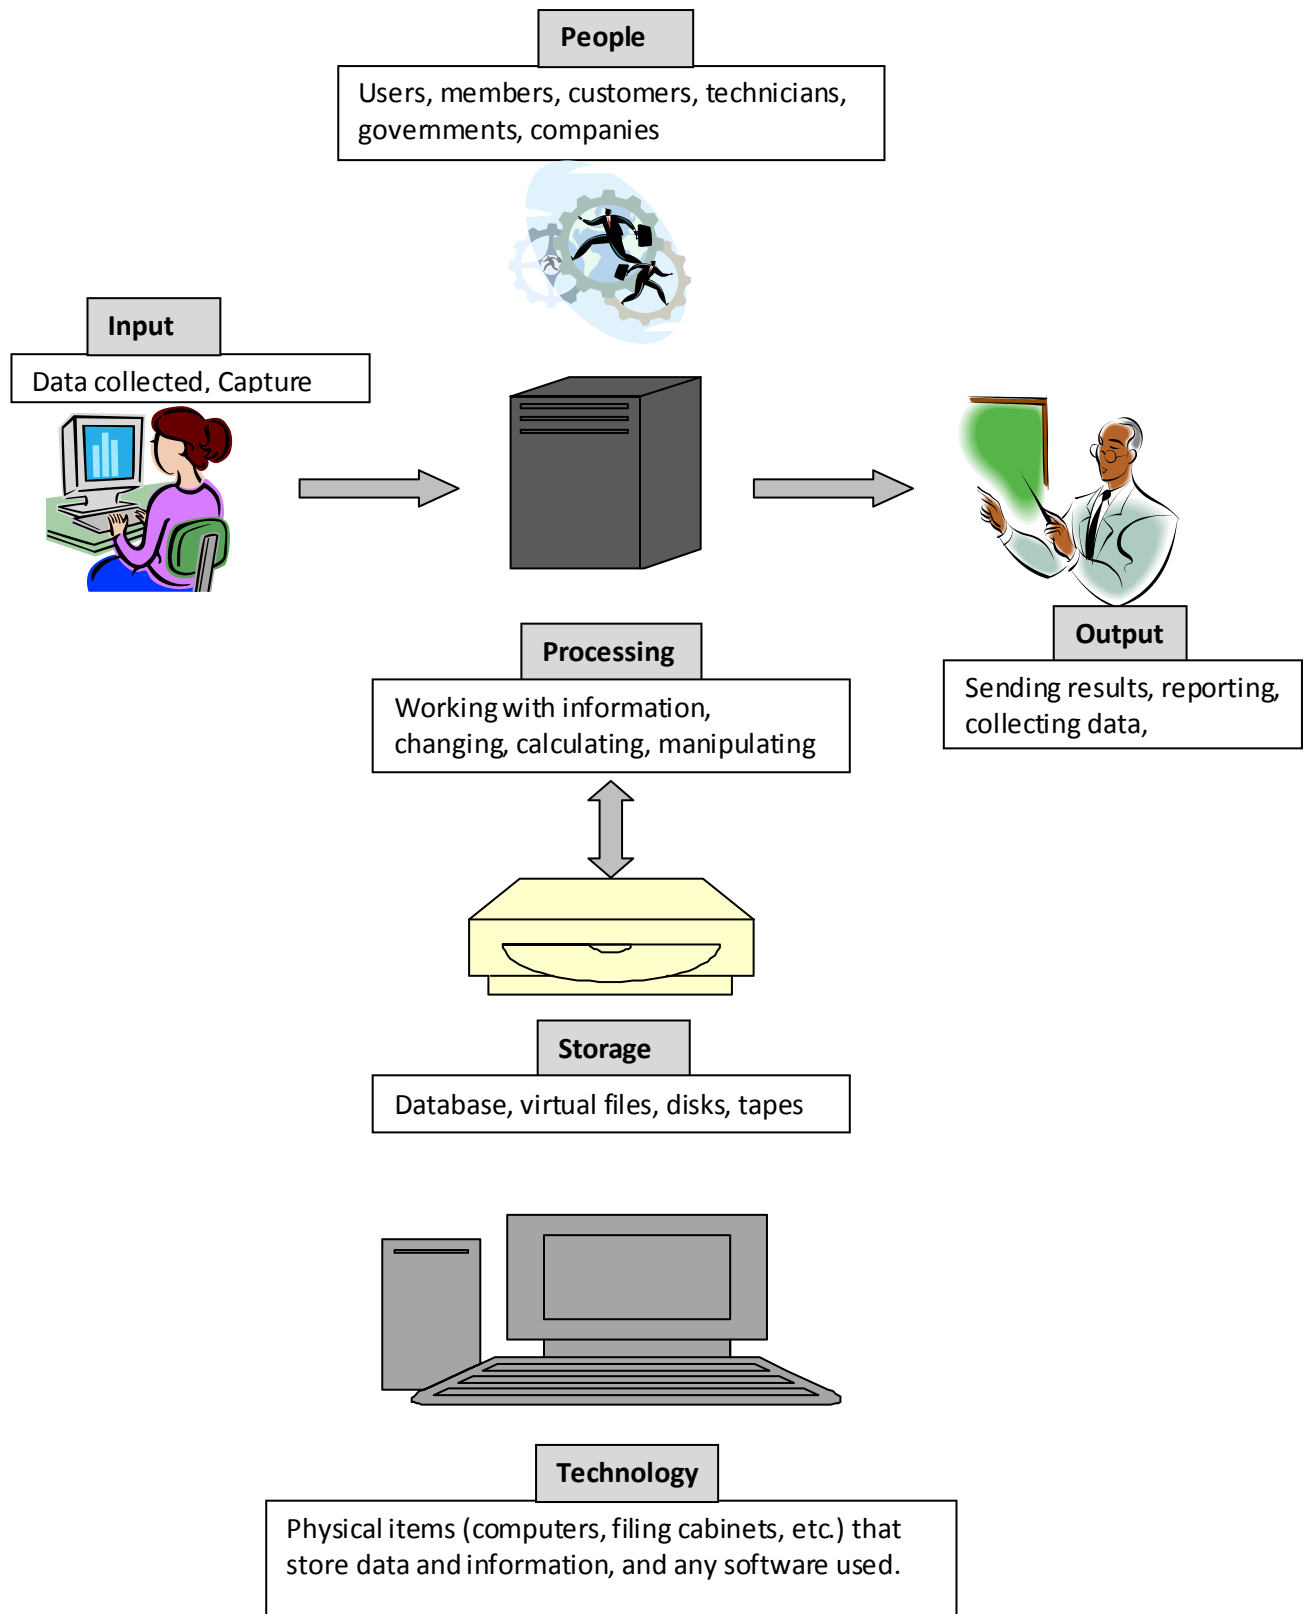

What did we do?

We reviewed the key business applications. Each application is important to the operations of IEPNG and may affect members as stakeholders including the public if the application is not managed appropriately.

Our application reviews looked at the systematic processing and handling of data to ensure that:

- Appropriate policies and procedures are in place to support reliable processing of information;
- Controls over data preparation, collection and processing of source documents are accurate, complete and timely before the data reaches the member services IT system application;
- Data entered into the application is accurate, complete and authorised;
- Data processed as intended in an acceptable time;
- Data output including online or hardcopy reports are accurate and complete;
- Interface controls are suitable to enforce completeness, accuracy, validity and timeliness of data transferred;
- Controls over master file integrity are effective which ensure changes are approved, accurate and complete;
- Controls over transaction logs ensure transaction history is accurate and complete;
- Duties are segregated and no staff perform or are capable of performing incompatible duties;
- The system/application is backed-up and can be recovered in the event of a disaster.

Diagram Representation - Key elements of focus of our applications review

What did we find?

Below is a summary table of the applications controls findings depicting the weaknesses and strengths of each of the process areas reviewed and rated in accordance with the best practices.

Summary of Findings

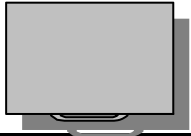

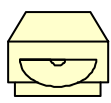

Area of Focus	Symbol	Risks Exposure Ratings		
		Minor	Moderate	Significant
Policies & Procedures			✓	
Security of Sensitive information		✓		
Data Input		✓		
Data Processing		✓		
Information Output		✓		
Segregation of Duties		✓		
Audit Trail		✓		
Master File Maintenance, interface controls, data preparation and storage			✓	
Backup & Recovery			✓	

Table 1

Minor: Management monitors and measures compliance with procedures and takes action where appropriate. Processes are under constant improvement and provide good practice. Automation and tools are used in a limited or fragmented way.

Moderate: Processes follow a regular pattern where similar procedures are followed by different people with no formal training or standard procedures. Responsibility is left to the individual and errors are highly likely.

Significant: Processes are undertaken on adhoc basis with no formal pattern of procedures being followed.

Ratings Definitions

Results of the IT risk assessment depict both known and perceived risk within the IT environment, based on interviews performed of key IT personnel. Areas identified as high-risk do not necessarily imply that there are problems with a particular application, process, or technology. Rather, high risk areas indicate that significant risk surrounds, and could potentially affect, this area.

Based on our findings, as depicted above in Table 1, their levels of IT risks exposure have been deduced or defined as follows:

Policies & Procedures

Policies and procedures in other words are simply application controls designed to prevent errors or omissions from occurring. They typically establish authority and assign duties, or segregate compatible duties and restrict access.

We have not sighted policies and procedures documentation governing the management of the member services database management and its operational system. However, with all other application controls operating adequately, and nature of the Institution's operations, *the level of risk exposure has been rated as moderate.*

Master File Maintenance (Database storage and Management)

Data and information are corporate assets that are created or gathered by IEPNG. Because they can make the Institution more valuable, they need protection. All accesses to members database have been noted to be well protected with adequate access and maintenance by authorised personnel only. However, the database is maintained, operated and accessed by authorised personnel on a standalone computer system, the risk for data overload, system failures, damaged through accidental or intentional exists, *therefore, its level of risk exposure has been rated as moderate.*

Backup and Recovery

Data is protected according to its value. Daily data backups are undertaken to ensure no data loss incurs and stored offsite.

However, data recovery/business continuity/disaster recovery planning and tests for data recovery and business continuity/disaster recovery have not been undertaken regularly to ensure it can overcome any potential data loss as soon as possible.

Therefore, the potential risks of data loss and being unable to recover data from the backups remains exists until tested, *therefore, its level of risk exposure has been set as moderate.*

Other 6 Areas of Focus

The other 6 focused areas are well controlled and practiced in the absence of IT Policies and Procedures Documentation. However, that does not mean that they are all performing well in mitigating their fair share of exposures to risks, hence, they need to be continuous monitoring and improvements in containment of all possible risks.

Their level of exposure to risks are very minimal, therefore, *they have all been rated as minor.*

(Refer rating definitions on page 6 above).

2. General computer controls (GCC) and capability assessments

Background

General IT controls typically impact a number of individual applications and data in the technology environment. The IT System General Controls Review is the assessment of the IT system's general controls put in place at IEPNG.

The objective of our GCC audits was intended to determine whether the computer controls effectively support the confidentiality, integrity, and availability of information systems. General computer controls include controls over the information technology (IT) environment, computer operations, access to programs and data, program development and program changes. We focused on the following control categories:

1. IT Operations
2. Management of IT Risks
3. Information Security
4. Business Continuity
5. Change Control
6. Physical Security

Capability maturity models are a way of assessing how well developed and capable the established IT controls are and how well developed or capable they should be. The models provide a benchmark for performance and a means for comparing results from year to year.

The models we developed use accepted industry good practice as the basis for assessment. Our assessment of the appropriate maturity level for IEPNG's general computer controls is influenced by various factors. These include: the business objectives of the institution; the level of dependence on IT; the technological sophistication of its computer systems; and the value of information managed by the IEPNG member services system.

What did we do?

We conducted GCC audits and capability assessments and benchmarked them against globally recognised good practice.

- Reviewed related corporate policies and procedures, regulatory requirements, etc.;
- Interviewed key finance, member services and information systems management personnel;
- Performed walkthrough transaction testing of processes areas especially members data entry, processing and output processes and IT systems;
- Performed a review of the information systems environment as related to IEPNG's Corporate Policies;

- Compared IEPNG's processes to established "best practices";
- Evaluated IEPNG's membership registration processes from data input to information output, database management and the internal control environment to "best control practices";
- Assessed the effectiveness and efficiency of member services systems and processes, noting opportunities for improvement.

What did we find?

Our capability maturity model assessments showed that IEPNG have adequate controls to manage IT operations, IT risks, information security and business continuity. However, we have also identified weaknesses that require continuous monitoring and improvements on an ongoing basis.

Below are summaries of the results of the capability assessments across all categories we reviewed. We expected IEPNG member services systems to rate a level 3 or better across all the categories due to its nature of operations general risks exposure.

GCC Category/ What we did	What we Found/ Weaknesses	Audit Remarks against Best Practices
1. IT operations We assessed whether IEPNG have adequately defined their requirements for IT service levels and allocated resources according to these requirements. We also tested whether service and support levels within IEPNG are adequate and meet good practice. Other tests included: • policies and plans are implemented and effectively working; • repeatable functions are formally defined, standardised, documented and communicated; • effective preventative and monitoring controls and processes have been implemented to ensure data integrity and segregation of duties.	• information and communication technology strategies not in place; • Member services system is running unsupported operating system; • unsupported databases for critical systems; • member services database and operating systems are stored on standalone PCs and not on a servers;	These types of findings can mean that service levels from computer environments may not meet the Institution's operational requirements or expectations. Without appropriate ICT strategies and supporting procedures, ICT operations may not be able to respond to business needs and recover from errors or failures. Effective management of IT operations is a key element for maintaining data integrity and ensuring that IT infrastructure can resist and recover from errors and failures.
2. Management of IT risks We reviewed procedures and processes practiced put in place in identifying, assessing, and mitigating key IT risks in safe guarding the IT Hardware, software	• risk management policies may be in draft or not developed; • inadequate processes for identifying,	IEPNG need to ensure that IT risks are identified assessed and treated within appropriate timeframes and that these practices become a core part of business activities. It needs to create its own risk register.

GCC Category/ What we did	What we Found/ Weaknesses	Audit Remarks against Best Practices
and usage. <i>(Refer Appendix A for risk definitions and Appendix C for IT risks)</i>	assessing and treating IT and related risks; • risk registers not maintained, for ongoing monitoring and mitigation of identified risks. • Member services operating system and database stored on standalone computers rather than housing on servers	IEPNG must develop risk management policies and practices that identify, assess and treat risks that affect key business objectives. IT is one of the key risk areas that should be addressed. We therefore expect IEPNG to have IT specific risk management policies and practices established such as risk assessments, registers and treatment plans. Without appropriate IT risk policies and practices, threats may not be identified and treated within reasonable timeframes, thereby increasing the likelihood that IEPNG's objectives will not be met.
3. Information security IEPNG met general benchmark for effectively managing information security. It is clear from the basic security weaknesses we identified that IEPNG is lacking some important and fundamental security controls needed to protect systems and information. We assessed whether IEPNG's controls were administered and configured to appropriately restrict access to programs, data, and other information resources. <i>(Refer Appendix B for process descriptions)</i>	• information security policies do not exist, or in draft form or not approved; • lack of processes to identify security vulnerabilities within IT infrastructure; • unauthorised software installations on staff computers can alter vital software data, especially for the two computers that currently house the operating member services and accounting systems;	Information security is critical to maintaining data integrity and reliability of key financial and member services operational systems from accidental or deliberate threats and vulnerabilities IEPNG should ensure good security practices are implemented, up-to-date and regularly tested and enforced for key computer systems. IEPNG must conduct ongoing reviews for user access to systems to ensure they are appropriate at all times.

GCC Category/ What we did	What we Found/ Weaknesses	Audit Remarks against Best Practices
4. Business continuity To ensure business continuity, IEPNG should have in place a business continuity plan (BCP), a disaster recovery plan (DRP) and an incident response plan (IRP). The BCP defines and prioritises business critical operations and therefore determines the resourcing and focus areas of the DRP. The IRP needs to consider potential incidents and detail the immediate steps to ensure timely, appropriate and effective response. These plans should be tested on a periodic basis. Such planning and testing is vital for IEPNG as it provides for the rapid recovery of computer systems in the event of an unplanned disruption affecting business operations and services.	• no Business Continuity Plans; • tolerable outages for critical systems not defined; • no DRP; • backups never tested	Business continuity management is the development of strategies, plans, and actions which provide protection or alternative modes of operation for those activities or business processes which, if they were to be interrupted, might otherwise bring about a seriously damaging or potentially fatal loss to the Institution. Without appropriate continuity planning there is an increased risk that key IEPNG functions and processes will fail and not be restored in a timely manner after a disruption. Disaster recovery planning will help enable the effective and timely restoration of systems supporting operations and business functions.
5. Change control We examined whether changes are appropriately authorised, implemented, recorded and tested. We reviewed any new applications acquired or developed to evaluate consistency with management's intentions.	• no formal change management policies in place;	Change control processes should be well developed and consistently followed for changes to computer systems. All changes should be subject to thorough planning and impact assessment to minimise the likelihood of problems. Change control documentation should be current, and approved changes formally tracked. Other

GCC Category/ What we did	What we Found/ Weaknesses	Audit Remarks against Best Practices
		changes to critical systems should be logged or approved; changes made to systems and critical devices must be well documented; risk assessments for major changes to infrastructure must be performed prior to changes being implemented; change control management team must be put in place to met to manage or consider changes; changes affecting staff are must be communicated
6. Physical security We examined whether computer systems were protected against environmental hazards and related damage. We also determined whether physical access restrictions are implemented and administered to ensure that only authorised individuals have the ability to access or use computer systems.	no fire suppression system installed within the server room nor the standalone Computers hosting the member services and financial management systems;	Inadequate protection of IT systems against various physical and environmental threats increases the potential risk of unauthorised access to systems and information and system failure. No significant threats were identified that require immediate management attention, however, it's always a good practice to monitor make minor improvements as time and resources permit on an ongoing basis.

Table 2:

How did we rate the findings?

We used a 0-5 scale rating to evaluate IENPG's capability and maturity levels in each of the GCC audit focus areas.

0 (non-existent)	Management processes are not applied at all. Complete lack of any recognisable processes.	Significant
1 (initial/ad hoc)	Processes are adhoc and overall approach to management is disorganised.	
2 (repeatable but intuitive)	Processes follow a regular pattern where similar procedures are followed by different people with no formal training or standard procedures. Responsibility is left to the individual and errors are highly likely.	Moderate
3 (defined)	Processes are documented and communicated. Procedures are standardised, documented and communicated through training. Processes are mandated however, it is unlikely that deviations will be detected. The procedures themselves are not sophisticated but are the formalisation of existing practices.	
4 (managed and measurable)	Management monitors and measures compliance with procedures and takes action where appropriate. Processes are under constant improvement and provide good practice. Automation and tools are used in a limited or fragmented way.	Minor
5 (optimised)	Good practices are followed and automated. Processes have been refined to a level of good practice, based on the results of continuous improvement and maturity modelling with other enterprises. IT is used in an integrated way to automate the workflow, providing tools to improve quality and effectiveness, making the institution quick to adapt.	

Table 3: Rating Criteria.

General computer controls (GCC) and capability assessments ratings

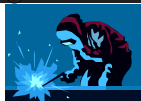

Area of Focus	Symbol	Ratings					
		0	1	2	3	4	5
IT Operations				✓			
IT Risks Management				✓			
Information Security				✓			
Business Continuity				✓			
Change Control				✓			
Physical Security				✓			

Table 4

Overall, the application processes and general computer controls and capabilities are adequately practiced and applied at its operational levels or user interface levels adequately.

It must be mentioned that IT Policies and Procedures ultimately sets the boundaries and governs all activities undertaken within IEPNG's IT System, which comprises of IT hardware, software and the users.

However, all GCC areas of focus lack processes and procedures documentation to govern their activities. Therefore, in accordance with the set rating scale from 0 to 5 (refer table 3), they have been all rated at level 2, apart from minor weaknesses identified (refer Table 2, column 2) which require continuous monitoring and improvements.

Recommendations

Management of IT operations

IEPNG should ensure that they have appropriate documented policies and procedures in place for key areas such as IT risk management, information security, business continuity and change control. IT strategic plans and objectives should be developed to support the Institutions business strategies and objectives.

Management of IT risks

IEPNG need to conduct an IT risk assessment to ensure that IT risks are identified; assessed and treated within appropriate timeframes and that these practices become a core part of the Institution's operational activities. It also needs to create its own IT risk register. *(Refer appendix C)*

Information security

IEPNG should continue to monitor in ensuring good security practices are implemented, up-to-date and regularly tested and enforced for key computer systems. IEPNG must conduct ongoing reviews for user access to systems to ensure they are appropriate at all times.

Business continuity

IEPNG should have a business continuity plan, a disaster recovery plan and an incident response plan. These plans should be reviewed and tested on a periodic basis.

Change control

Change control processes should be well developed and consistently followed for changes to computer systems. All changes should be subject to thorough planning and impact assessment to minimise the likelihood of problems. Change control documentation should be current, and approved changes formally tracked and well documented and communicated to all staff.

Physical security

IEPNG should continue to monitor, develop and implement additional physical and environmental control mechanisms to prevent unauthorised access or accidental damage to computing infrastructure and systems.

General computer controls and capability assessments Conclusion

Change controls and physical security are managed effectively by IEPNG. However, management of IT risks, information security, business continuity and IT operations need continuous monitoring and improvements require a much greater focus.

Most importantly, we recommend for the member services database and its operating system to be housed on a specialised server than being stored on a standalone computer.

Conclusion

Our Audit scope encompassed the examination and evaluation of the adequacy and effectiveness of IEPNG's Information Systems governance, risk management process, system of internal controls, and the quality of performance in carrying out assigned responsibilities to achieve IEPNG's stated goals and objectives, guided by the TORs as presented in the body of this report, we conclude that;

Quality of the System of Internal Control

Critical Internal control deficiencies do not exist, nor are there any other deficiencies which warrant immediate attention by management. Audit findings, if any, relate to improvements in existing controls and suggestions for alternative or additional control procedures requires continuous monitoring and improvement.

Compliance with Established Policies and Procedures

Procedures performed are generally at acceptable levels based on the current IT System establishment. However, without an established IT Policies and Procedures documentation, we were unable to clearly rate the current practices compliance.

Accuracy of Information

Member's database is well managed and properly secured. However, minor member data inaccuracies do exist in member services information database but are considered not significant.

Assessment of Risk Associated with Present Environment

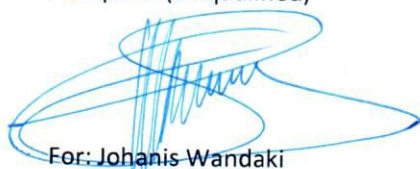

Practices are balanced to risks. Minor deficiencies in the overall system of internal control may exist and errors/noncompliance with procedures is likely to be detected on a timely basis, overall, risk exposure is at acceptable levels.

Urgency of Corrective Action by Management

As time and resources permit, continuous monitoring and improvements is required, however, a Gap Analysis Audit may be conducted to further improve the quality of the IT Management Systems. The system of internal controls as practiced provides reasonable assurance that the IT systems are well secured and objectives will be achieved.

Conclusion (Opinion)*

Adequate (Unqualified)*

Niugini Business Consultants

Port Moresby Branch Report

The Port Moresby Branch is one of 9 branches of the Institution of Engineers Papua New Guinea and was established back in 2002. Other branches include Lae (has a Student Chapter it supports), Lihir, Kavieng, Wewak, Rabaul, Sepik, Tabubil and Highlands Branches.

The objectives of the Branch as defined in the Branch Guidelines are:

1. To enhance the character and status of the engineering profession and advance the interest of the profession of engineering and those engaged therein;
2. To promote honorable practice and mutual respect, and to decide all questions of engineering practice and issues affecting Members of the Branch;
3. To provide opportunity for continuing professional development and promote fellowship among Members; and;
4. To promote engineers involvement in charity and community development.

The Branch Committee is divided into two groups, the Executive Committee and the Committee with another group who take up a role on their own interest to help with Branch activities who are the Volunteers.

Executive Committee: Comprises of the Chairman, Deputy Chairman, Treasurer and Secretary. They are tasked to approve proposed activities, allocate budget, secure funding and monitor the implementation of the activities.

Committee: Comprises of Members of the Branch who are elected / appointed during the Branch Annual General Meeting (AGM) or by the Executive Committee to carry out specific tasks for the branch and also propose activities to be approved by the Executive Committee.

Volunteers: The Branch activities are not just composed of the elected Committee. If there is a need for help in any of the activities, the Committee reaches out to any engineer or able minded professional who is interested in taking part in some of the activities. They are then assigned to a team and then get engaged in the execution.

1.1 Branch Committee

The Committee is member elected and then Committee appointed by the Executives. The election process is governed by our Branch Guideline which stipulates that each executive has a 2-year term. The electronic voting system has been trialled out in the 2018 Branch executive elections and was a success. We intend to use the same in the next election in 2020 which the term of the current executives will expire. The following chart provides what the 2018 Branch Committee was at the end of 2018:

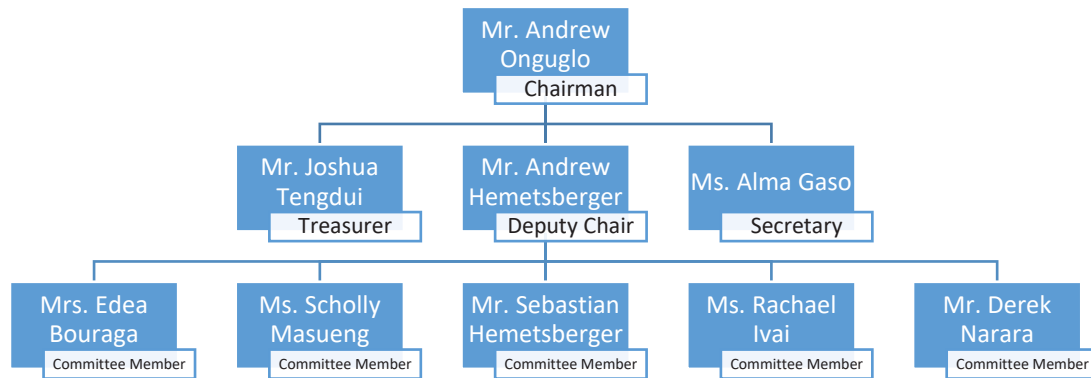

Figure 1: 2018 Branch Committee

During the course of 2018, there were few changes to the Committee:

- New addition/changes to the Committee were:
 - o Executive Committee: Mr. Andrew Onguglo moved from Deputy Chairman to Chairman replacing Mr. Tony Morisause; Mr. Andrew Hemetsberger moved from Secretary to Deputy Chairman; Mr. Michael Luwong was elected Secretary
 - o Committee Members: Ms. Rachael Ivai and Ms. Alma Gaso joined as Committee Members replacing Mr. Norman Ray.
- Our Treasurer, Mr. Wellington Warren and Secretary, Mr. Michael Luwong had to vacate their roles due to work commitments. The Executives and the Committee Members made a decision to co-opt two committee members to fill up the vacancies. Mr. Joshua Tengdui was co-opted as the Treasurer and Ms. Alma Gaso as Secretary of the Branch. This decision was made to maintain continuity and smooth operation of the Branch.
- During the year, additional support was required to the Committee therefore Mr. Derek Narara was appointed to join the Committee.
- Following are pending decision from the members:
 - o Executive Committee: Acceptance of appointed Treasurer and Secretary
 - o Committee Members: We would like to inform the Members that; Mrs. Edea Bouraga and Ms. Scholly Masuseng have served adequately in the Branch and would like to move on leaving vacancy for committee members.

To contact the Branch Committee, below are the email accounts that have been established since January 2018:

- Chairman: POMChair@iepng.org
- Deputy Chairman: POMDeputy@iepng.org
- Treasurer: POMTresurer@iepng.org
- Secretary: POMSecretary@iepng.org

2 BRANCH ACTIVITIES

The Branch has been involved in several activities in the period which is outlined in the following sections. However, note that it is now established that going forward, each report for the year that comes out will be for the period between January – December of the year and not any other date. 2017 annual report captured some activities for 2018 which is identified here in the report.

Branch main activities for January – December 2018 were:

1. Port Moresby General Hospital – Children’s Ward backup generator installation
 - a. Installation of generator done and handed over to the Hospital
 - b. This was reported as part of 2017 report therefore not included here
2. Engineering Technical Talks
3. Engineering is Fun School Talks
4. Fundraising Dinner to assist Angau Hospital, Lae

2.1 Launching of Branch Guideline

The Branch Guideline became effective after the IEPNG Board approved the Guideline and was launched by the CEO of Institution of Engineers, Mr. Benedict Mick at the AGM in 2018. Last year was the first year of implementation. It is the first step for the branch to have in place a guiding document which provides the objectives and roles and responsibilities of executive(s), committee(s) and member(s).

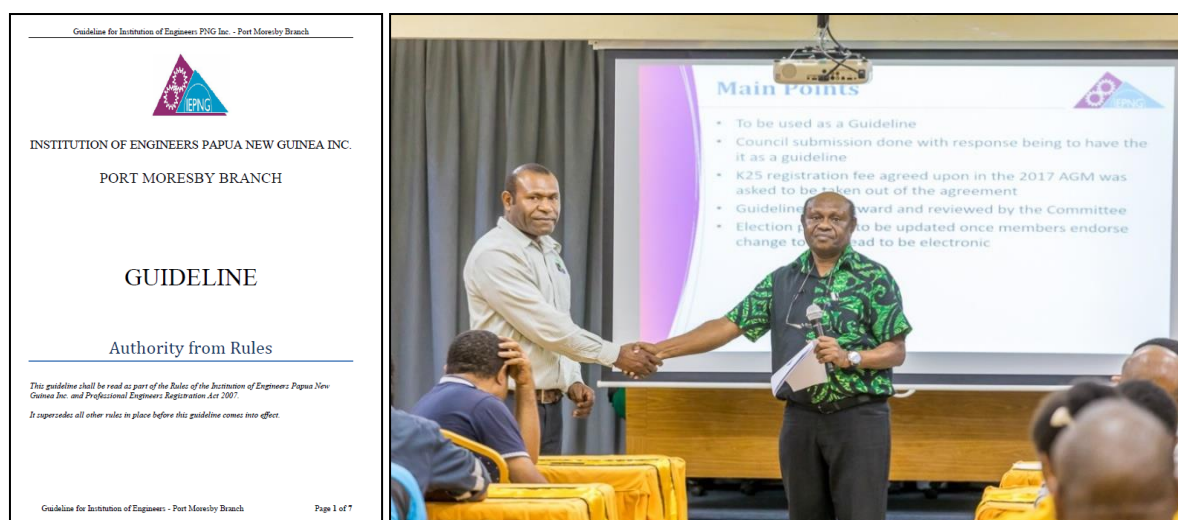

Figure 2: Launching of Branch Guideline by Mr. Mick, CEO Institution of Engineers, PNG Inc.

During the implementation of the Guideline, there appears to be a need to structure the operation of the branch so that the Mother Institution appropriately funds the branch to deliver on its objectives.

Going forward, the Branch will request for the delegation of Powers from the IEPNG Board to ensure compliance in accordance with the Professional Engineers (Registration) Amendment Act 2007 within NCDC and Central Provinces.

With the delegation of powers, the Branch can schedule out Quarterly Inspections to companies that employ engineers within NCDC and Central Provinces to ensure compliance. Reports of the findings will be furnished to the Board for deliberations and further actions where warranted. This will give more visibility and respect which the institution deserves.

2.2 Engineering Technical Talks

The Engineering Technical Talks have always been a part of the routine activity that the Port Moresby Branch tries to do on an annual basis. Compared to previously organized talks, 2018 was different as the intent, objectives and a more detailed process of the Techtalks were established. Below indicates how the branch meets the overall Institution objectives detailed in the Corporate Strategic Plan 2012-2022:

Objective 6: Acquiring, sharing, providing and promoting engineering knowledge to improve the profession and to continuously sustain engineering competency throughout an engineering professional's career;

- **Point 1:** Facilitate workshops, conferences, luncheons to disseminate information on emerging technologies and knowledge.

The first technical talk was held in July 2018 and the last one held in December 2018. Each of the sessions provided some feedback into how to better improve the technical talks. This was done after each talk where a survey was sent to the participants to get their feedback.

Airswift approached the Branch after the first technical talk to see if the Branch was considering sponsorship. This was well received as that was the next step that the Branch wanted to take after the first session. Discussions were held which ended up with a request sent for sponsorship where it was approved and the Branch partnered with Airswift to host the Technical Talks.

Each of the Techtalk presenters were provided with a certificate of appreciation for their time in getting together the presentation. Airswift organized merchandise to provide to the participants which was done in the last two Techtalks. The Branch is also arranging for IEPNG merchandise corporate gift packs to be provided for future Techtalks in 2019 which will include a pen, power pack and a USB.

In terms of advertising, a flyer was circulated through email and also posted on social media. The flyer design was initially done by the Committee for the first two sessions. After the partnership was established with Airswift, they took on the role of advertising for the techtalks. Airswift generated a new design template which the Branch is currently using – refer on the next page for the initial flyer and current flyer template.

IEPNG PORT MORESBY BRANCH

ENGINEERING TECHNICAL TALKS

Intent 1. Facilitate the acquisition and sharing of engineering knowledge;
2. Provide the opportunity for engineering / workforce networking

Topic: New 66/11kV AIS Substation at Kilakila
Design and Benefits

Date: Wednesday, 22nd August 2018

Venue: PNG Power Training College (refer attached map)

Time: 12:00 -1:00pm

**Free Admission
For any interested**

Presenter:	Ms. Leonnie Paranda
Employer:	PNG Power Limited (PPL)
Position Held:	Lead Engineer POM Grid
Field of Study:	Civil Engineering (Unitech - Lae)
Experience:	8 Years in Industry

Presentation Abstract: PNG Power Limited is constructing a new 66/11kV AIS Substation that will:

- Inject additional system capacity and reduce loads on adjacent substations at Boroko and Konedobu.
- Improve power system reliability and quality to the southern side of Port Moresby from Konedobu and in particular the POM CBD.
- Provide for future system load growth particularly in POM CBD and towards Tourama and Magi Highway.

Involvement in project: Lead Engineer on site overseeing design, procurement and installation works of the project.

- Light refreshments to be provided
- Presentation to be delivered in a classroom style
- Contact Andrew Hemetsberger, 7031 8559 if any questions

The Institution of Engineers Papua New Guinea Inc. (IEPNG)
Port Moresby Branch and Airswift present

ENGINEERING TECHNICAL TALKS

Friday, 19th October 2018
12:00 PM – 1:00 PM
Gateway Hotel
Corner Jacksons Parade, Port Moresby 121

Engineering Technical Talks intend to facilitate the acquisition and sharing of engineering knowledge and provide the opportunity for engineering / workforce networking in a classroom style atmosphere.

Guest Speaker
Mr. Tony Morisause
PNG DataCo Limited

Mr. Tony Morisause is the General Manager for Engineering Services at PNG DataCo Ltd and oversees all engineering design, implementation and commissioning of this project. He studied Electrical Engineering in Telecommunications and has 31 years of industry experience

Discussion
Kumul Submarine Cable Project—ICT Game Changer for PNG

The Kumul Submarine Cable Project, as part of the National Transmission Network (NTN) Programme undertaken by PNG DataCo Limited is set to transform and channel the telecommunications industry into achieving the country's 2050 vision. This is a network that will connect 14 coastal and maritime provinces with a total of 6,000km of fibre optic submarine cables deployed around the coast of PNG. The network will be equipped with carriage capacity of 2x1000bps between provincial centres and 100bps bandwidth lit up initially on commissioning. Potentially, this capacities shall offer Papua New Guinea the greatest opportunity to match development and growth needs competitive with the first world economies being a game changer for PNG.

Admission is free and light refreshments will be provided
To RSVP email
IEPNG@AIRSWIFT.COM

For more information, please contact Andrew Hemetsberger at 7031 8559

BEFORE AIRSWIFT PARTNERSHIP

AFTER AIRSWIFT PARTNERSHIP

Figure 3: Example of flyers from initial advertisement to when Airswift partnered with the Branch to help with the Talks

The 2018 Techtalk journey, 2018 overview and details of each of the Technical Talks are provided below with a summary of the presenter, the discussion and some feedback from the participants.

2.2.1 2018 Technical Talk Journey:

Below is a summary of what the journey has been in 2018 for the Technical Talks:

Date	Event
Jul-18	1st Talk held at the Gateway Hotel
Aug-18	2nd Talk held at the PNG Power Training College - Talks with Airswift initiated in terms of partnership for hosting of the Technical Talks - Request sent through for partnership and sponsorship of refreshments and advertisements
Sep-18	3rd Talk held at the PNG Power Training College - Partnership and sponsorship from Airswift approved - ExxonMobil requested to sponsor for venue and facilities and was approved making it possible to host the next 2 Talks at the Gateway Hotel
Oct-18	4th Talk held at the Gateway hotel - Venue sponsored by ExxonMobil PNG Limited
Dec-18	5th Talk held at the Gateway Hotel - Venue also sponsored by ExxonMobil PNG Limited

2.2.2 2018 Hosted Technical Talks

Date	Venue	Facilitator	Presenter	Employer	Years Exp.	Topic	Att.
18-Jul-18	Gateway Hotel	Mr. Andrew Hemetsberger	Mr. John Relhang, Project Director	Kumul Consolidated Holdings (KCH)	15	The Benefits of the Port Moresby Sewerage System Upgrading Project	23
22-Aug-18	PPL College	Mr. Joshua Tengdui	Ms. Leonnie Paranda, Lead Engineer	PNG Power Limited	8	The New 66/11kV AIS Substation at Kilakila – Design and Benefits	13
19-Sep-18	PPL College	Mr. Andrew Hemetsberger	Mr. Gilbert Hamambi, Manager Asset Reliability	Ok Tedi Mining Limited	15+	Developing Maintenance Strategies using RCM aided by Reliability Engineering Software Tool.	26
17-Oct-18	Gateway Hotel	Mr. Andrew Hemetsberger	Mr. Tony Morisause, General Manager Engineering Services	PNG DataCo Limited	31	Kumul Submarine Cable Project – ICT Game Changer for Papua New Guinea	52
14-Dec-18	Gateway Hotel	Mr. Derek Narara	Mr. Gavera Toua, Structural / Civil / Designer and Builder	Wilkinson Portfolio Ltd	8	Introduction to Etabs 2016, an Integrated Analysis, Design and Drafting	26

2.2.3 2018 Technical Talk Sessions Summary

Technical Talk #1: Port Moresby Sewerage System Upgrade Project Design & Benefits

Guest Speaker: Mr. John Relhang

Mr. John Relhang is the Project Director who managed and controlled the implementation & execution of the project to meet target deadlines and budget of the project. He studied Civil Engineering at the PNG University of Technology and has 15 years of design and construction experience.

Discussion:

The Port Moresby Sewerage System Upgrade Project (POMSSUP) is to construct a new sewerage facility and to rehabilitate the existing failed infrastructure to improve the sanitary and living conditions of the people in the southern coastal catchment of the National Capital District, Port Moresby.

Figure 4: Mr. Relhang doing his presentation

Figure 5: Tech Talk #1 in session with view of project site

Tech Talk #1 Survey Feedback Question: Did you learn or get some engineering knowledge from the presentation?

- Yes, I learnt about the cost of this project and the process used for this particular sewerage system.
- Very informative. Thanks
- A fair understanding of how the Sewerage system works and what goes on in the background. It was interesting to learn and understand how the sewerage system works and is managed.
- Speaker not very technically knowledgeable. May have been better to include a backup technical person more knowledgeable on technical aspects of the project. I was expecting the talk to be on Project engineering process, how scope was defined, demand calculations, what worked, what did not work, why certain things worked/not worked, schedules, budget management, procurement systems/difficulties, tax implications from donor funding point of view, etc.
- I gained more insight into the sewerage network in Port Moresby
- Yes I did. Was interesting to learn UV is the last treatment stage before discharge.
- The new sewer system and network
- Sewerage Treatment and Project Management
- Understand a bit more about the sewerage network in Port Moresby and the current situation

Technical Talk #2: New 66/11kV AIS Substation at Kilakila Design and Benefits

Guest Speaker: Ms. Leonnie Paranda

Ms. Leonnie Paranda is the Lead Engineer on site overseeing design, procurement and installation works of the project. She studied Civil Engineering at the PNG University of Technology and has 8 years of industry experience.

Discussion:

PNG Power Limited is constructing a new 66/11kV AIS Substation that will:

- Inject additional system capacity and reduce loads on adjacent substations at Boroko and Konedobu.
- Improve power system reliability and quality to the southern side of Port Moresby from Konedobu and in particular the POM CBD.
- Provide for future system load growth particularly in POM CBD and towards Taurama and Magi Highway.

Figure 6: Ms. Paranda presented with Certificate of Appreciation

Figure 7: Tech Talk #2 Participants

Tech Talk #2 Feedback Survey Question: Did you learn or get some engineering knowledge from the presentation?

- How the station was safely designed.
- What components make up a power grid system
- Yes I have learnt so much. Also, I am part of this team, SP1 at Kilakila Substation.
- Yes, I did. Very good to know that the project will help the Moresby South people plus others to have access to power and electricity.
- With an Engineering background, the electrical and power side of engineering was very informative

Technical Talk #3: Developing Maintenance Strategies using RCM aided by Reliability Engineering Soft-ware Tool

Guest Speaker: Mr. Gilbert Hamambi

Mr. Gilbert Hamambi is the Manager for Asset Reliability at Ok Tedi Mining Limited and looks after all the assets in the mine in terms of reliability. From January 2008 to July 2010 (2 years, 7 months) Mr. Hamambi was the Senior Reliability Engineer at Ok Tedi Mining Limited providing technical Reliability and Maintenance Engineering support to the Mill Maintenance Department and the Crusher Production & Maintenance Department. While developing and optimizing existing maintenance strategies for a plant system he took on the initiative to document the process and also wrote a paper and submitted it to the Asset Maintenance Management Journal (www.maintenancejournal.com) which was published in its February 2010 issue. He has a degree in Mechanical Engineering and has more than 15 years of industry experience.

Figure 8: Mr. Hamambi presented with Certificate of Appreciation

Discussion:

The presentation was on the systematic approach in use at Ok Tedi Mine which includes the selecting of a PdM/CM technique for a given equipment failure mode. Mr. Hamambi explained and showed the use of computer simulation (RCMCost) in assisting with the development, optimization and selection of the PdM/CM technique to deploy.

Figure 9: Tech Talk#3 in session and light refreshments provided

Tech Talk #3 Feedback Survey Question: Did you learn or get some engineering knowledge from the presentation?

- It was a refreshing session for me.
- An understanding of the kind of tools that are out there that can be used to build Equipment Strategies.
- Learnt another way to do RCM on equipment

Technical Talk #4: Kumul Submarine Cable Project—ICT Game Changer for PNG

Guest Speaker: Mr. Tony Morisause - PNG DataCo Limited

Mr. Tony Morisause is the General Manager for Engineering Services at PNG DataCo Ltd and oversees all the engineering design, implementation and commissioning of this project. He studied Electrical Engineering in Telecommunications and has 31 years of industry experience

Discussion

The Kumul Submarine Cable Project, as part of the National Transmission Network (NTN) Programme undertaken by PNG DataCo Limited is set to transform and channel the telecommunication industry into achieving the country's 2050 vision. This is a network that will connect 14 coastal and Maritime Provinces with a total of 6,000km of fiber optic submarine cables deployed around the coast of PNG. The network will be equipped with a carriage capacity of 2x100Gbps between provincial centres and a 10Gbps bandwidth lit up initially on commissioning. Potentially, this capacity shall offer Papua New Guinea the greatest opportunity to match development and growth needs which are competitive with the first world economies and will be a game changer for PNG.

Figure 10: Mr. Tony Morisause presenting

Figure 11: Airswift staff assisting with registration of participants & venue setup

Figure 12: Talk #4 in session (room was packed to capacity of 50 participants)

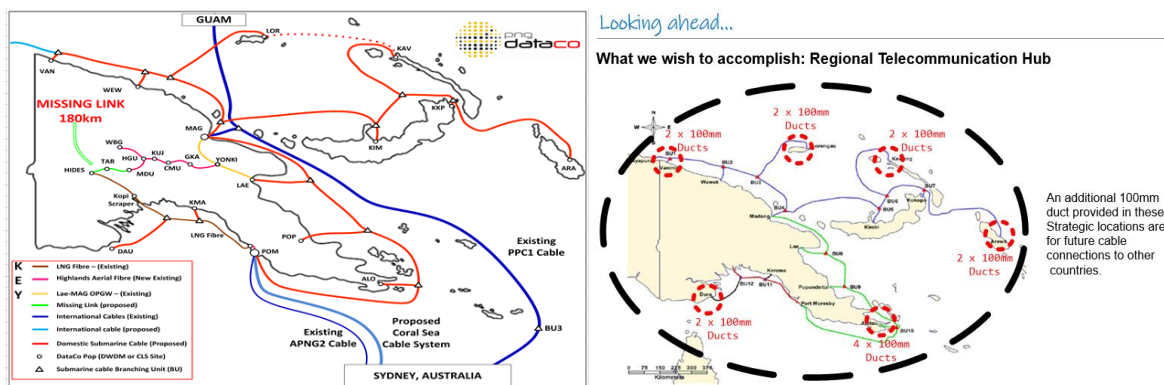

Figure 13: Selected presentation slides

Tech Talk #4 Feedback Survey Question: Did you learn or get some engineering knowledge from the presentation?

- Prior to attending this tech talk, had limited knowledge about the Kumul Submarine Cable Project, other than what I had heard (word of mouth).
- A lot about internet providers.
- Different cable coating for different sea location/scenario, Fiber optic cable design (outline) both on land and sea, even fiber require REPEATERS

- Learnt more about how DataCo will come in place to run ICT in country and it's a very big game changer for this country.
- The topic was more focused around what they are doing around PNG. The presentation however gave me a view of what to expect come 2019 with regards to internet speed and what they are doing around the country to achieve that.
- Fiber Optic and project scope with its benefits.
- The key learning for me was the general awareness of the project scope, schedule, cost and key stakeholders. It was good to see how it tied into the country's vision 2050. The internet of things is crucial going forward into the future and this is a key infrastructure.
- About different type of fiber cables.
- As a Civil Engineer, the whole presentation was very informative.
- I did gain some knowledge about the project.
- Great to see the technology that was used and that PNG is heading in the right direction.

Technical Talk #5: Introduction to Etabs 2016 — Analysis, Design and Drafting Software

Guest Speaker: Mr. Gavera Toua

Mr. Gavera Toua is a Structural / Civil / Designer and Builder at Wilkinson Portfolio Ltd and has certification on the use of Etabs 2016 with its use being applied to several projects carried out. He studied Structural & Civil Engineering and has 8 years of industry experience.

Discussion:

From the start of design conception through to the production of schematic drawings, ETABS integrates every aspect of the engineering design process according to relevant standards. Creation of models has never been easier - intuitive drawing commands allow for the rapid generation of floor and elevation framing. Presentation to cover an example use of the software and capabilities to existing project to showcase the software.

CAD drawings can be converted directly into ETABS models or used as templates onto which ETABS objects may be overlaid. The state-of-the-art SAPFire 64-bit solver allows extremely large and complex models to be rapidly analysed, and supports nonlinear modelling techniques such as construction sequencing and time effects (e.g., creep and shrinkage).

Figure 14: Mr. Toua presented with Certificate of Appreciation

Figure 15: Tech Talk #5 in session

Tech Talk #5 Feedback Survey Question: Did you learn or get some engineering knowledge from the presentation?

- Using Sketchup program and import it to ETABS which is more simplified for structural analysis.
- Use of the software.
- The power of Etabs and what it can do for structural design.

2.2.4 2019 Engineering Technical Talk Schedule

#	Date	Presentation Topic
1	08-Mar-19	Mr. Andrew Barry's career progression, PNG LNG Project, its expansion and what it means for Papua New Guinea
2	26-Apr-19	Port Moresby Electricity generation, distribution and transmission: Design, facility, maintenance and fault rectification
3	21-Jun-19	Presenter yet to be sourced. Lots of great topics received from feedbacks which will be considered.
4	23-Aug-19	
5	18-Oct-19	
6	20-Dec-19	

2.2.5 Feedback Survey Data

After each technical talk, a survey was done to get feedback from the participants. Below are the specific questions asked together with what the general feedback conclusions were:

1. How did you hear about this technical talk?
 - a. Most heard through Social Media vs. email or other means
2. Did you learn or get some engineering knowledge from the presentation?
 - a. Almost all response were yes in terms of awareness and gaining an understanding of what was presented (you can see the specific comments per above for each Technical Talk session held)
3. Did you get to meet someone new before or after the presentation?
 - a. Almost half of the participants indicated yes while others came to hear about the presentation
4. Was the timing (12-1pm) suitable for you?
 - a. 12-1pm was the majority of responses received. However, in the afternoon after work was another option that was indicated

5. Any comments about the light refreshments?
 - a. No negative comments received on refreshments
6. Was the venue setting good for you? The setting style was “Classroom style”
 - a. Classroom style was sufficient however the Branch feels to encourage networking, another style will be trialled
7. Where would you like the next presentation to be held at? Where would be convenient for you?
 - a. Most indicated Gateway Hotel however there were no limitations on locations
8. Can you suggest an interesting engineering topic or project that you would like to hear about?
 - a. A lot of interesting topics suggested of which the team looks into providing. The challenge in having a presentation is finding a presenter.
9. What are your overall comments to the project? Do you think it’s beneficial to the residents of Port Moresby? Does it add value to the Community?
 - a. This is related to the particular topic and generally indicated the benefits
10. How long in advance would you like to be notified about future technical talks?
 - a. Most put down a month in advance. The Committee tries to provide the participants with the next topic towards the end of the presentation or posting the flyer a month prior to the talk.

2.3 Engineering is Fun School Talks

The Engineering is Fun School Talks have always been an outreach program that the Branch does on a routine basis. It meets the Institutions Corporate Strategic Plan 2012-2022 per defined below:

Objective 9: To increase the number of young Papua New Guineans to develop a career in engineering and technology

- **Point 2.** Create interest in youth orientated programs and events to promote engineering in Papua New Guinea
- **Point 3.** Encourage members to be involved in local schools to promote engineering through activities such as engineering school projects

Due to changes in 2018 committee and executive committee of the POM Branch, the Schools Talks did not eventuate as planned. Nonetheless, there is now a schedule in place for 2019 that will put more emphasis on schools that have responded well with our inquiries in 2018. We are in discussion with three schools within NCDC and have discussed with them the plans of the Branch.

The schools that the Branch is in contact with are;

- Gordon’s Secondary School
- Port Moresby International School
- Port Moresby Grammar

Due to anticipated changes in time/schedule, priority will be given to responsive schools where appropriate plans will be done to determine a suitable time for each grade or for a combined presentation to occur. Also we will call on volunteers who are willing to take part or better still present on an engineering topic that they are currently working on.

2.4 Competency Based Assessment

Competence Based Assessment (CBA) is now the official process of Registration with the Professional Engineers Registration Board (PERB) and Financial Membership with the Institution of Engineers PNG (IEPNG). All categories of IEPNG membership will now use the new forms to apply for new applications as well as renewal of membership. The following table 1 outlines the forms that are applicable to each category of membership with IEPNG and table 2 shows the Registration categories for PERB.

Table 1: IEPNG Financial Membership Categories and Applicable forms.

#	IEPNG Membership Category	Applicable forms to fill in
1	Student (StudIEPNG)	CA01
2	a. Graduate (GIEPNG) (From University with no work experience)	CA01
	b. Graduate (GIEPNG) (With +2yrs work experience)	CA01, CA04, CA05
3	Technician (TechIEPNG)	CA01, CA04, CA05
4	Companion (ComplIEPNG)	CA01, CA04, CA05
5	Member (MIEPNG)	CA01, CA03, CA04, CA05, CA06
6	Fellow (FIEPNG)	CA01, CA03, CA04, CA05, CA06

Table 2: PERB Registration Categories

#	PERB Registration Category	Registration level	PERA approved Title & abbreviation
1	Graduate (with 2 to 4yrs work experience)	Provisional Registration	NA
2	Member	Full Registration	Registered Engineer/ Reg.Eng
3	Fellow (with over 15yrs of Professional Engineering experience and/or significant contribution to Engineering in PNG)	Full Registration	Registered Engineer/Reg.Eng

The Papua New Guinea Professional Engineers Registration Act (PERA) (Amendment 2007) stipulates that all engineers working on any engineering works or activities for PNG whether they are onshore or offshore must be registered with the PERB in order to carry out those works or activities. Therefore, it is important to register as a Professional Engineer with the PNG PERB. Under the current PERA, only those engineers in the IEPNG Membership categories of Member and Fellow are to be registered. This means that any engineer with a first degree in engineering and has more than four (4) years of professional engineering practice is required by law to register with the PNG PERB. Thus, those in the IEPNG membership category of Member and Fellow who apply for membership or renewal of membership must fill in all the forms indicated on page 16 and fulfil all Competency Based Assessment requirements in order to be registered on the Professional Engineers Register (PER).

Furthermore, it is important for all members, in particular, the members with a four (4) year Degree in Engineering from the PNG University of Technology or other recognised Universities to now apply for membership and registration using the CBA Application forms. Under the CBA process all Engineers who apply and are assessed and qualify will get registered for three (3) years from January 2019, thus their membership and registration will expire in December 2021 and will need to be renewed in January 2022.

The Branch appreciates the efforts of the IEPNG Office Member Services Section who assisted our Committee Member, Mrs Edea Bouraga conduct the CBA awareness workshops not just in Port Moresby but in all major towns of the four (4) regions of PNG including the Newcrest Mine at Lihir, Hidden Valley Mine in Bulolo and Ok Tedi Mine in Tabubil in the last 3 years.

The Branch is happy to report that our Deputy Chairman, Mr. Andrew Hemetsberger and Committee member, Ms. Rachel Ivai have successfully gone through the CBA and are now registered under the new PERB/IEPNG CBA system.

For those engineers and employers of engineers that want further information on CBA application process, please contact:

IEPNG Member Services

Telephone: (675) 3258763 / **Email:** memberservices@iepng.org

2.5 Fundraising Dinner

Following the successful implementation of the Port Moresby General Hospital Children's Ward Project, the IEPNG POM Branch Committee decided to embark on a new Project for 2018 in its endeavour to contribute to the local PNG community. Below states how this activity helps with the Institution Corporate Strategic Plan 2012-2022:

Objective 8: To create an environment where each member or potential member and each staff member feels that their contribution will be valued on merit and their needs understood regardless of their professional or personal background.

- **Point 2.** Find ways for more members to contribute back to the profession through such avenues as service on committees, boards, conferences, workshops etc.

Additional to the Corporate Plan, support of this initiative falls under the "Community Wellbeing" Code of Ethics:

"Members shall positively contribute to the wellbeing of the community and when involved in any engineering project or application of technology do their best to ensure that affected parties are identified, properly informed and consulted."

The aim of the Fundraising dinner was to financially support a Community Project which the Branch had to identify, scope out and deliver.

2.5.1 Fundraising committee

In-order to carry out any Project successfully, a committee was formed to drive this fundraising activity. The members nominated comprises of Miss Scholly Masueng who was the Team Lead with the assistance of Ms Rachel Ivai and Ms Alma Gaso. The efforts and updates of the committees were discussed at Team and Committee meetings.

2.5.2 Dinner Activity Update

The Fundraising Dinner is a proposed activity included in the POM Branch 2018 deliverables. The proceeds from this fundraiser is to be used to support a local community project.

The Branch initially decided to assist 'The Cancer Ward of ANGAU Memorial Hospital' in Lae, Morobe Province in any way with treatment, medication, care and or counselling. The Branch reached out to The Director Medical Services who advised on the immediate needs of the Hospital. Due to the huge amount of funds required, the Committee was not able to assist in a meaningful way and hence had to identify another local charitable organization in need of assistance. The Organizations that responded requesting assistance included:

- Life PNG Care
- Links of Hope PNG
- PNG Cheshire Home and
- PNG Kidney Foundation

After a review, the Committee decided on the 21st of August 2018 to assist the PNG Cheshire homes. The planned deliverables for this Branch activity will have to be a well-organized Fundraising Dinner with the target to raise enough funds to assist The Cheshire Home with:

- i. Procurement of 2 x Lawn mowers with 1 x drum of fuel
- ii. Purchase and installation of a standby generator

It is the plan of the Committee to have a written proposal including the installation, set-up and maintenance of the standby generator which is currently being worked on and will be supplied as part of the deliverables.

Although Hotel reservations were made, the Committee was not able to host the dinner in 2018. This activity has now been postponed to 2019 where it will be done later in the year with consideration with the planned Institution Annual General Meeting and dinner on the 26th of April 2019.

3 2019 BRANCH PLANS

2018 has been a year of planning and work establishment with appropriate plans now in place to ensure the activities of 2019 are achieved. Below are the 2019 Branch activities:

Activity	Intent	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
Committee team and meetings <i>Interval: Every 2 months</i>	Branch updates and stewardship (financial update every other meeting)	×		×		×		×		×		×	
Annual General Meeting (AGM) <i>Interval: Annual - to be held in the month of March</i>	Report out to Branch Members on progress and plans for following year. Announcement of new Committee.	×		×									
Welcome and Handover Workshop <i>Interval: Annual - to be held right after AGM</i>	To ensure proper handover of responsibilities and welcome new committee members with planning and assigning of activities			×									
Planning Workshop <i>Timing: Annual - to be held in September</i>	To plan for the following year activities									×			
Primary School Talks <i>Interval: Quarterly</i>	To influence and encourage students to take up engineering as their profession and also to provide them with an understanding of what engineering is		×			×			×			×	
Engineering Technical Talks <i>Interval: Every 2 months</i>	To encourage engineers to present on some of their work, break-through, information sharing and networking		×		×		×		×		×		×

4 CONCLUSION

What a year it has been with a lot of good work done by the Committee in getting the Branch going and achieving new heights and approaches. It is these kinds of efforts that are always sought for the success of the Branch. The Committee is committed in 2019 which will be an exciting year with consideration of the anticipated grant from ExxonMobil PNG Limited. A whole new standard to the Port Moresby Branch is coming and the Committee is excited to kick off the year with the aim to:

1. Raise the standards of the engineering profession in Port Moresby.
2. Enable more engagement from engineering professionals in Port Moresby.
3. Reward volunteer time through awards.

Lae Branch Report

LAE BRANCH EXECUTIVES

The elected executives for the term 2019 – 2021 as follows:

Chairman – Palanga Wickham

Deputy Chairman – Elsie Loth -

Secretary – Grace Wantepe

Treasure – Dan Tapado -

Committee Member:

Civil Engineering – Murray Konzeing

Mining Engineering – Dr. Arpa

Mechanical Engineering – Mark Thomas

Electrical Engineering – Herman Konsei

Student Representative – Rengi Wai

Lihir Branch Report

Branch committee members are:

Benjamin Misren
Billy
Danielle Gunnell
Elsie
John Tububol
Franz Hemetsberger

The newly started Lihir branch of IEPNG has had a slow start to setting up branch activities. Bank Account is still in process of being set up. Activities haven't kicked off in earnest yet.

Main reason for this is the Fly-In-Fly-Out rosters and difficulty with getting together for continuity of activities. More involvement from members is key to making the branch a success and this is acknowledged.

Main activities in 2018:

1. The Women In Engineering Weekend “Engineering is Fun!” October 2018

“The first focus of my attention for this role will be to promote Engineering as a potential career choice for girls. Many are not exposed to the potential that Engineering careers have to offer and therefore never consider it as a possible career choice. Exposing school age girls to what engineering is and what it can offer them can open their minds to the possibility but also demonstrate that engineering can also be fun. If girls are to choose Engineering as a career, it is important for them to understand the importance of math and science as they move through their later school years.” – Danielle Gunnell

2. Competency Based Assessment Workshops – November – December 2018

Weekly workshops were run for weeks leading into December to help and assist engineers with their CBA applications and raise awareness. This was to support the IEPNG direction that membership to IEPNG and registration of engineers from 1st of January 2019 will be through the Competency Based Assessment system.

Activities that add value to engineers and the wider community are needed to show case the engineering profession. The highlight for the Lihir Branch has been the Women In Engineering Weekend! Well done to the team that organised this awesome event!

Kavieng Branch Report

OVERVIEW

The IEPNG New Ireland Branch (IEPNG Nir Branch), was formed in September 2017 after a visit by the CEO Mr. Ben Mick , Board Member Mrs Edea Bouraga and Accounts Officer Ms Emie Mavoko.

The elected Interim Committee Executives were:

- President- Mr. Solomon Pela
- Vice President-Mr. Wesley Taram
- Secretary-Mr. Sen Hugo
- Treasurer-Mr. Francis Sabadi
- Mr. Jake Bautista-Committee
- Mr. Robert Gorei-Committee
- Ms Deborah Paulus

Branch meetings were conducted on 22 September 2017, 16 November 2017 and on 7 February 2018.

The largest employers of New Ireland Engineers and Technicians are Newcrest Mining Limited and the Department of Works and they hold executive positions in the 2018 Executive Committee.

The Contractors are represented by the Deputy Chairman.

ACHIEVEMENTS

1. Capacity Building.

- DOW New Ireland is managed by Graduate Engineers and Technicians and handle a very large CAPEX budget of the Provincial and National Government.
- IEPNG allowed these officers to gain key competencies through the following training in 2017 and 2018:
 1. Project Management Fundamentals;
 2. Contract Administration;
 3. Project Costing;
 4. FIDIC Conditions of Contract;
 5. Estimating, Tendering and Evaluation of Tenders; and
 6. PM 5-Modules.

2. Building a vibrant, robust and effective engineering network.

- The NIR Branch Executive Committee established effective communication with AusAID through TSSP to award Pro-Forma Contracts to SME contractors based in New Ireland with the sole target of giving them work and building up their technical, financial and managerial capacities.

3. Building an effective relationship with Stakeholders.

- The most important stakeholders are represented in the 2018 Executive Committee. These include, New Crest Mining Limited, SME Contractors and the National Government.
- A very close working relationship has been forged with the New Ireland Government and New Crest Mining Limited..

4. The IEPNG Board's Historical visit to the New Ireland Province.

THE WAY FORWARD

1. IEPNG to approve an innovative capacity building training programme for the New Ireland Province to be co-managed with the IEPNG NIR Branch.
2. 2019 Training Courses to include hands-on civil and building design courses.
3. IEPNG Board to approve and co-fund through annual budgetary provisions an effective IEPNG NIR Branch Secretariat.
4. IEPNG Board to set up a Technical Audit Task force in the New Ireland Province to enforce the IEPNG Constitution and the Professional Engineers Registration (Amendment)Act.

Sepik Branch Report

WEWAK

1. Mr. Benjamin Haiken - Chairman
2. Mr. Daniel Pirindou – Deputy Chairman
3. Mr. Raymond Sumbia – Treasure
4. Mr. Duffy Hopkos – Secretary

The Elected Committee Members are;

5. Mr. James Baloiloi
6. Mr. Cassian Aron
7. Mr. Augus Jimbira

Rabaul Branch Report

EXECUTIVES

1. Mr Raymond Paulias – Chairman
2. Mr Francis Moro – Deputy Chairman
3. Ms Martina Ikau – Secretary
4. Mr Rolly Vuvul – Treasurer

Tabubil Branch Report

EXECUTIVES

1. Mr Yaka Meap – Chairman
2. Mr Meninga Memafu – Deputy Chairman
3. Mr John Pala – Treasurer
4. Ms Monica Koea – Secretary

The Elected Committee Members are;

5. Mr John Yalomba – Committee Member
6. Mr Greg Koloa – Committee Member
7. Mr Walter Haija – Committee Member
8. Ms Margaret Futengim – Committee Member
9. Mr Craig Waters – Committee Member

Highlands Branch Report

EXECUTIVES

1. Mr Jacob Kelly Kata – Chairman
2. Mr Nathan Poka – Secretary
3. Mr Amos Moka - Treasurer

Competency Based Assessment (CBA)

Competency Based Assessment

Competence Based Assessment (CBA) is now the official process of Registration with the Professional Engineers Registration Board (PERB) and Financial Membership with the Institution of Engineers PNG (IEPNG). All categories of IEPNG membership will now use the new forms to apply. This is for new applications as well as renewal of membership. The following table 1 outlines the forms that are applicable to each category of membership with IEPNG and table 2 shows the Registration categories for PERB.

Table 1: IEPNG Financial Membership Categories and Applicable forms.

IEPNG Membership Category	Applicable forms to fill in
1. Student (StudIEPNG)	CA01
2a. Graduate (GIEPNG) (From University with no work experience)	CA01
2b. Graduate (GIEPNG) (With +2yrs work experience)	CA01, CA04, CA05
3. Technician (TechIEPNG)	CA01, CA04, CA05
4. Companion (ComplIEPNG)	CA01, CA04, CA05
5. Member (MIEPNG)	CA01, CA03, CA04, CA05, CA06
6. Fellow (FIEPNG)	CA01, CA03, CA04, CA05, CA06

Table 2: PERB Registration Categories

PERB Registration Category	Registration level	PERA approved Title & abbreviation
1. Graduate (with 2 to 4yrs work experience)	Provisional Registration	NA
2. Member	Full Registration	Registered Engineer/ Reg.Eng
3. Fellow (with over 15yrs of Professional Engineering experience and/or significant contribution to Engineering in PNG)	Full Registration	Registered Engineer/Reg.Eng

The Papua New Guinea Professional Engineers Registration Act (PERA) (Amendment 2007) stipulates that all engineers working on any engineering works or activities for PNG whether they are onshore or offshore must be registered with the PERB in order to carry out those works or activities. Therefore, it is important to register as a Professional Engineer with the PNG PERB. Under the current PERA, only those engineers in the IEPNG Membership categories of Member and Fellow are to be registered. This means that any engineer with a first degree in engineering and has more than four (4) years of professional engineering practice is required by law to register with the PNG PERB. Thus, those in the IEPNG membership category of Member and Fellow who apply for membership or renewal of membership must fill in all the forms indicated in the table 1 above and fulfil all Competence Based Assessments requirements in order to be registered on the Professional Engineers Register (PER).

Furthermore, it is important for all members, in particular, the members with a Four (4) year Degree in Engineering from PNG University of Technology or other recognised Universities to now apply for membership and registration using the CBA Application forms. Under the CBA process all Engineers who apply and are assessed and qualify will get registered for three (3) years from January 2019, thus their membership and registration will expire in December 2021 and will need to be renewed in January 2022.

The Institution appreciates the efforts of Council Member Mrs Edea Bouraga, Ms Finkewe Zurecnuoc, Mr Franz Hemetsberger who assisted to conduct the CBA awareness workshops not just in Port Moresby but in all major towns of the 4 regions of PNG including the Newcrest Mine on Lihir and Ok Tedi Mine in Tabubil and Morobe Consolidated Goldfields Ltd.

CBA Awareness/Tutorial Sessions held in and outside of Port Moresby from March 2018 to March 2019

Organisations in Port Moresby

- Eda Ranu – 15th March 2018
- Water PNG – 16th March 2018
- Mineral Resource Authority – 21st March 2018
- PNG Ports Corporation Limited – 5th April 2018
- Department of Works, Material Laboratory & Testing – 10th April 2018
- Global Construction Limited – 15th June 2018
- Department of Works, Executives – 17th October 2018
- Telikom PNG Limited – 30th October 2018
- NICTA – 2nd November 2018
- Stocks & Partners -
- National Airports Corporation – 21st November

Outside Provinces

- Newcrest Mining Limited – 7th – 17 May 2018
- Ok Tedi Mining Limited – 22nd – 23rd May & 30th October 2018
- Lae Engineers – 20th – 21st June 2018
- Morobe Consolidated Goldfields Limited – 27th June 2018
- Mt Hagen (Highlands Region) – 6th July 2018

Competency Based Assessment Awareness

So far in 2019, following organisation has requested and CBA Tutorial sessions were conducted;

- Curtain Bros PNG Limited – 15th January 2019
- Eda Ranu – 14th February 2019
- Port Moresby Engineers – 17th January 2019
- NES Global Talent – 21st January 2019
- Tabubil Engineers – 24th January 2019
- Airswift Limited & NES Global Talent – 30th January 2019
- Barrick Niugini Limited – 18th February 2019
- Puma Energy PNG Limited – 19th February 2019
- Puma Energy Refining Limited – 21st February 2019
- Harmony SE ASIA – 22nd February 2019
- Air Niugini Limited – 5th March 2019
- NICTA – 6th March 2019
- PNG Air Services - 7th March 2019
- M&E Partners – 18th March 2019
- Highlands Region (Goroka) – 30th March 2019

CBA Awareness in Goroka

CBA Awareness in Hidden Valley, Morobe
